

## Devil's Slide/Hwy 1 Storm Repair

Daily Updates from Bijan Sartipi

**Daily Update**  
Aug 2

### Repair Work

Devil's Slide (post mile 39.14)

- Electrical contractor St. Francis Electric continued to work on the slide sensor system.
- K-rail installation continued.

Bringing in concrete K-rail

- Drilling horizontal drains 30 to 40 feet below the road started today. Work continued to construct the temporary access path for the drill rig.

Drill rig and excavator working below the road

Slide Location No. 3 (post mile 39.77)

- Work continues on the retaining wall at this location.

Retaining wall overview

Starting to take shape

- Other activities included road sweeping and general clean up; pressure washing and painting concrete K-rail; layout for road striping and removal of security gates.
